 This is the fastest and most reliable method.

2. Submit XML Sitemap

A sitemap helps Google understand your website structure:

Example:

- `yourwebsite.com/sitemap.xml`

Keep it updated whenever you publish new content.

3. Internal Linking Strategy

Link new pages from already indexed pages. This helps Google bots discover your content faster and improves crawl priority.

4. Social Media Sharing

Sharing content on platforms like:

- Facebook
- X (Twitter)
- LinkedIn

helps improve discovery signals and indexing speed.
